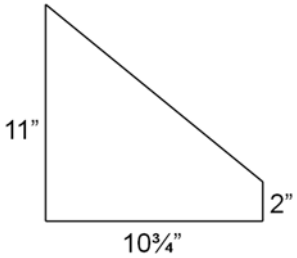
Serged Back to School Folder

Project submitted to www.berninaUSAblog.com by Sandra Larson Swick

Cutting & Fusing

- Fast2fuse
  a. Cut one 13” x 22” rectangle
  b. Cut one 10 ¾” x 9” rectangle
  c. Cut one 11” x 10 ¾” rectangle – cut angle as shown



- Cover fabric – cut two 11” x 22” rectangles.
  Using a Teflon ironing sheet, press one side to the fast2fuse; turn over and press the other side to the fast2fuse.

- Cover fabric – cut one 18” x 10 ¾” rectangle.
  Fold around 10 ¾” x 9” fast2fuse; press 3 seconds in each area.

- Cut and fold remaining fabric over slanted piece and press. Fold point to the back.

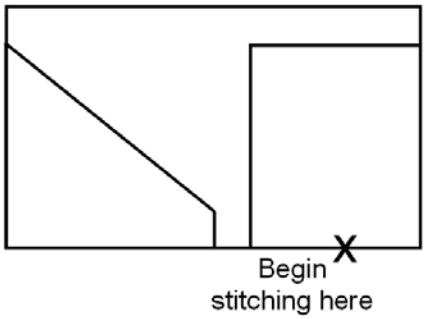
Stitching

- Set serger for a 2-thread wrapped stitch with Pearl Crown Rayon in the lower looper and using the upper looper converter. Use the settings recommended in your serger manual. Run a test on a scrap of fast2fuse.

- Serge the left edge of the 9” x 10 ¾” folder piece. Remember to bring the beginning tails across the blade to secure. Fray check the lower edge.

- Stack the folder together and clip.

- Beginning at the lower right edge of the folder, serge around the edges. Use outside corner method to turn the corners. Sew across the start of the serging. Stop; do not sew off at an angle. Remove the folder and pull the serger threads to one side; tie and fray check.



Thank you, Sandra, for sharing this with us! Erika & Jo
